NELVIN S. AMONSOT

App & System Developer | AI-Powered Automation | Amazon Product Listing & Operations

dadotamonsot@gmail.com | +63 970-697-1316 | Cotabato, Philippines (open to remote work)
Portfolio: nelvin01.github.io/nelvin.portfolio | linkedin.com/in/nelvin-amonsot-4b652a217

PROFESSIONAL SUMMARY

App & System Developer who turns slow, manual business processes into working software. I have designed, built, and shipped **5+ systems now in real use** with Claude Code, the Claude and OpenAI APIs, Supabase, Auth0, Next.js, Netlify, and Vercel. They include a records and finance system that generates **11 types of official documents**, an AI app that reads shipment paperwork and fills in forms, **69 live production dashboards**, and an Amazon Flat File generator that **cut listing turnaround from one month to one week**. I build from real operating experience: I managed a **25,000+ ASIN** Amazon catalog, raised its listing quality score from **2.8 to 8.7**, led an **11-person remote team**, and ranked **#2 company-wide** in my employer's internal performance system. BS Chemical Engineering, Cum Laude.

TECHNICAL SKILLS

AI & Development: Claude Code, Claude API (vision, structured data extraction), OpenAI API, Cursor, prompt & schema design, spec-driven builds, n8n

Languages & Frameworks: JavaScript, TypeScript, HTML/CSS, Next.js, Tailwind CSS, Python (tooling & scripts), SQL

Backend & Data: Supabase (Postgres, Storage, Row-Level Security), Auth0 sign-in & roles, Airtable, REST APIs & webhooks, serverless functions, IndexedDB, Word (.docx) generation

Delivery & Testing: Git/GitHub, Netlify (branch preview deploys), Vercel, GitHub Pages, Hostinger, Playwright end-to-end tests, separate test and live environments

Amazon & E-commerce: Seller Central, Flat Files & bulk uploads, parent-child variations, Helium 10, listing SEO, A+ Content, Brand Story, SQP & Business Reports, Shopify

Operations & PM: Remote team leadership, SOPs, KPI dashboards, Notion, Slack, Asana, ClickUp, Trello, GoHighLevel, HubSpot, Monday.com, Brevo, QuickBooks, Excel

SELECTED PROJECTS

SK Records and Finance System

Sangguniang Kabataan of New Pandan, Matalam, Cotabato | JavaScript, Python, Word templates, OpenAI API, Playwright

- Built a single-file web app that runs offline with nothing to install and generates **11 types of official council documents** as Word files that match the official letterhead, fonts, numbering, and line numbers exactly: notices, order of business, minutes, resolutions, committee reports, activity designs, MOAs, and accomplishment, documentation, and evaluation reports.
- **Finance features:** budget tables with automatic line totals and balances, and monthly/quarterly financial report resolutions written from the date and total (amount spelled out in words), plus ABYIP budget tables.
- Added pre-download checks (quorum, duplicate numbers, missing dates), AI drafting of formal clauses using only the facts given (with API credit tracking and a no-API-key fallback), and backup/import between computers.
- Wrote a Python tool that converts real .docx files into fillable templates. The app is protected by **8 Playwright end-to-end test suites**.

Receiving Digitizer with AI Auto-Fill

RSH Décor | Live: v2--rsh-recieving-digitization.netlify.app | Claude API (vision), Supabase, Netlify Functions, Auth0, JavaScript

- Built a phone-first web app: receivers scan a QR code, photograph shipment paperwork (packing slips, BOLs, invoices, damage reports), and submit it to private cloud storage with a **searchable archive**.
- In V2, **Claude reads the captured pages and auto-fills the form**, flagging unclear fields, and falls back to manual entry if the AI is unavailable so receiving never stops.
- Added role-based sign-in with Auth0, and shipped V2 as a separate preview deploy on test tables and storage so live data was never at risk.

Amazon Flat File Automation App

RSH Décor | Claude Code, Excel automation, Amazon Flat Files

- Built an end-to-end app that generates ready-to-upload Amazon Flat Files for new listings and parent-child variations, **cutting turnaround from one month to one week (~75% faster)**.
- The company's internal performance report named it the only work on the team that removes future work rather than just completing tasks.

Live Production Tracking Dashboards
RSH Décor | Supabase, Airtable, JavaScript

- Rebuilt Airtable production reports as **69 live web dashboards across 18 production areas** (cutting, sewing, packing, inventory, shipments, overdue and stuck orders, scans per operator), each checked against the source data.

Gabay-Tesis Digital Impact Portfolio
SK New Pandan, 22nd TAYO Awards entry | Live: gabay-tesis.vercel.app | Next.js, TypeScript, Tailwind CSS, Vercel

- Built an impact portfolio site presenting a youth research mentorship program (**162 beneficiaries**) around the awards' judging criteria. All content lives in simple files so non-technical staff can update it.

PROFESSIONAL EXPERIENCE

Operations Manager | Amazon SEO & Listing Optimization | App & System Development — **Jan 2024 – May 2026**
RSH Décor (remote)

- Designed and shipped internal apps, automations, and dashboards with Claude Code, Cursor, Supabase, Netlify, and Vercel, including the Flat File app, the AI Receiving Digitizer, and 69 live production dashboards.
- Managed end-to-end Amazon and e-commerce operations across a catalog of **25,000+ active ASINs**: listings, catalog management, SEO, Flat Files, product content, analytics, and Shopify workflows.
- Owned listing SEO with Helium 10 (keyword research, competitor analysis, audits, titles, bullets, backend search terms), **raising the account's listing quality score from 2.8 to 8.7**.
- Created and troubleshot Flat Files for bulk listing creation, parent-child variations, and attribute updates. Resolved suppressed listings, catalog errors, Buy Box/Featured Offer issues, and Seller Support escalations.
- Managed and trained a **cross-functional remote team of 11** across listing, Flat File, image generation, and Shopify work. Wrote SOPs and kept live KPI trackers.
- Reported weekly to senior leadership. **Ranked #2 company-wide** in the internal Impact-Weighted Performance Report, behind only the owner, with a 99/100 discipline score. Recognized as a "Needle-Mover" and Top Team Builder.

Executive and Administrative Assistant — **Jun 2022 – Jun 2025**
Local Chief Executive's Office, Municipality of Matalam

- Supported the Mayor with calendars, briefings, reports, and stakeholder communication. Kept digital document systems and KPI tracking in Google Workspace.

Chairperson, Administrator, Bookkeeper & Accountant — **Aug 2022 – Dec 2025**
Sangguniang Kabataan (Youth Council) of New Pandan, Matalam, Cotabato

- Led youth governance and programs. Handled full-cycle budgeting, disbursement, liquidation, and bookkeeping under COA rules, plus resolutions, reports, and compliance documents (the work later automated by the SK Records and Finance System).

Research Specialist and Data Analyst — **Sep 2020 – Oct 2024**
Client-based

- Delivered quantitative and qualitative analysis, datasets, dashboards, and technical reports for academic, government, and private clients.

Cold Calling (Sales) — **May 2024 – Nov 2024**
Swihart's Company (US-based)

- Ran high-volume outbound calls, qualified leads, and booked appointments in a CRM, meeting or beating daily and weekly targets.

EDUCATION

BS Chemical Engineering, Cum Laude — **2020 – 2025**
Mindanao State University – Iligan Institute of Technology

LEADERSHIP

- **Mindanao President**, PIChE Junior Chapter Mindanao (2023–2024): led inter-university coordination and regional programs.
- **President**, JPIChE MSU-IIT Chapter (2022–2023) | **Budget Head**, Northern Mindanao Association of DOST-SEI Scholars (2022–2023)
